## Specification Sheet EPDM

Basis:	EPDM
Cellstructure:	closed
Density:	ca. 140 – 150 kg/m <sup>3</sup>
Degree of hardness:	RE 41
Compression-Deflection ASTM 1056:	ca. 40 k Pa.
Compression set 50% - 24 h at RT and 24/h DIN 53572:	5 – 10 %
Linear shrinkage:	< 5 %
Temperature range:	ca. + 100° C
Lowest temperature range:	ca. - 30° C
Flammability FMVSS 302:	starting with 7mm demands are measured < 100mm/min.

Differing porosity and surface-structure as well as differing chemical and technological knowledge are subject to proviso. All technical values are tested with best possible thoroughness. No responsibility is accepted for the correctness of this information.

With cellular material shrinkage is commercial and unavoidable.
